

## Jaunty Co. History and Profile

Jaunty has permanent showrooms or warehouse facilities located in Los Angeles, Atlanta, Dallas and High Point. Our off shore locations include Qingdao China, New Delhi India and Paris France, where the company originated 60 years ago.

Jaunty was the first United States based company to establish a hand made rug manufacturing joint venture with the Chinese Government. Jaunty also has strategically aligned partners of hand made rugs in India.

With over 70 years of combined retail history in better to high-end furniture, specialty and department stores, Jaunty's marketing team excels at unique and sophisticated systems for the presentation of hand made rugs.

Known for style, quality and value, we excel at new and innovative designs and constructions. Vertically integrated, we spin and dye our own wool to maintain quality control. All our rug designs are hand made in tufted, woven and hand knotted qualities. We maintain a wide selection of programmed rugs as well as many one-of-a-kind works of art. Jaunty is unique in the industry as we manufacture our own line of rug fixtures and displays as well as produce our own media publications including product information hangtags, signs, banners, newspaper advertising and full color inserts.
